

APL Case Study

Project: **Leeds College of Building**
Date: **2018**

Background:

- APL were involved from an early stage with the architects, providing design and costing advice throughout the tendering process, along with significant design support as the project progressed
- APL's technical expertise and close relationships with its supply chain ensured that solutions were provided to some very complex colour requirements

Systems:

- 1,400m² of half-round profile AP50HR in aluminium with an anodised-look PPC finish
- 850m² of sinusoidal profile AP18HR in aluminium with an anodised-look PPC finish
- APL Tritherm™ GALV support system onto SFS
- LB4 live louvre system
- All fixings and accessories

Building Location:

- Leeds
